

Dear friends,

How are you? I hope everything is good and all are healthy and fine at home. Wish you all peace and joyful Easter festive greetings. I always remember you for all the goodness and concern you show towards my studies.

I have two things to share with you. I finished my third year MBBS studies and I entered to my final year studies which is very challenging. Also last month I had an opportunity to go to one of the states in India that is Chhattisgarh where I went as a tribal doctor as part of my studies. I have learnt lot there .The people over there were so loving and they also welcomed me with love. I also realised the worth of becoming a doctor.

I reached back to the college during the holy week and the celebration of Easter followed. Easter season is one of my favourite seasons because I got an inspiration to join the congregation on Easter Saturday. I also believe that always to have an everlasting joy we all should go through good Friday. The joy we experience after liberation from a most difficult situation is unexplainable. Easter I celebrated with my community sisters here in St. Johns. We also had sumptuous dinner.

Life as a final year student is hard and full of busy classes and lot of learning. I need lot of spiritual support through prayers. God has always worked wonder in my life not because of my prayers but because many people pray for me. You are also the one who pray for me and God listens to the prayer and gives me enough strength to continue my studies because he has a definite purpose to be fulfilled.

I am happy indeed to always share some of the incidences with you and I pray to God for you so that whatever may be your hearts desire be fulfilled and you may have healthy and lengthy life. Thank you for all that you are doing to me and thank you for special concern towards me.

Thank you

Yours faithfully

Geswine
