

Dear friend,

13.04.2026

How are you. Hoping everything is bright and beautiful. Writing this letter after some time. A great opportunity to remember recollect and enjoy telling you all the events of the past.

First of all I ask the almighty blessings for this opportunity of working as a doctor here in a village of HD kote and for all the experiences. These experiences have made me strong not only in clinical experience but by faith that he can actually move mountains in the sense that he can make miracles. Sometimes I am stunned how suddenly the cases that I find difficult to solve will just resolve by his grace. When I am anxious and unsteady, scared sometimes Jesus works through me.

A beautiful example that I can share is there was a patient who came to emergency who was looking fine but his blood pressure was constantly low pulses were not felt, talking fine active and so on. Dint know what was the problem blood tests were done showed infection in the body.

But examination didn't show the area of infection then decided to do X ray and then diagnosed his problem, we treated him here and he went healthy. Many such cases specially children we see everyday here. Also daily there are new borns everyday they are very cute till they are fine but if any infection or they are sick their disease is like treasure hunt for all of us.

I am here working with almost 8 doctors among which 3 are senior consultants. They are clinically very well experienced and working under them is a great privilege. Hoping that I gain lot of experience and when I work in our dear hospital that is Mount Rosary hospital I can help people there with this same experience. All the days are not the same sometimes fully drained with emergencies and a lot of work but we doctors spend time discussing and improving ourselves by then feedback we receive.

Also celebrated Easter in a very meaningful way. The services and the holy week was kept holy, remembering the great sacrifice Jesus did for us inspire he was God. He didn't tell no to his father's will though he knew that it was difficult for him to bear the struggle. When I find somethings difficult at times, over stressed by some work then I remember him who said yes to everything knowing that what happens in my life is under his complete

control only thing he expects of me is my co operation, and I always try to remain faithful to him, no matter what the struggles are.

I remind myself always about the story of Jona who ran but God brought him back so if I am not committed to his mission or his love because he loves me so much he will force me for my good.

Last but now the least I pray to God the almighty that as he has risen from the dead that we celebrate as Easter may he rise in your hearts and be active and alive in you too.

One of the proofs that he is still active and alive in you is he kindles your heart to help those who are in need like how you have helped me financially. Nothing goes unnoticed in his presence.I pray that he may bless you and your family abundantly and joy peace and happiness reign in your family.

Thankyou

Yours sincerely,

Sr.Geswine
